Name this chemical element after one clue for 30 points, after two for 20, or after all three for 10 points:

1. In 2002, scientists discovered that this metal -- used in fountain-pen tips and phonograph needles -- is the only substance stronger than diamond in its resistance to compression.
2. It has the highest melting point and the lowest vapor pressure of any of the platinum group of metals.
3. It has the highest density of any element.

**ANSWER:** OSMIUM
